CHARTER SCHOOL PROCUREMENT

NEW

The Office of the Inspector General has developed this two-day seminar to assist charter schools in satisfying the requirement (Section 11 of Chapter 46 of the Acts of 1997) that certain charter school administrators earn a Massachusetts public purchasing official certificate. Charter schools are subject to some state procurement laws, are exempt from others, and are always responsible for sound business practices and best value procurement. Efficient, effective, and ethical contracting practices are essential for charter schools working to achieve their goals and objectives in a cost-effective manner. This seminar concludes with an examination.

Topics covered include:

- Massachusetts procurement laws and Commonwealth charter schools
- DOE expectations and recommended procurement practices
- Overview of legal requirements for public contracts
- Procuring supplies or services
- Acquiring or disposing of real property
- Legal requirements and best practices for procuring construction services including a summary of the 2004 public construction reform law.

Scheduled dates:

June 7 & 8, 2006

One Ashburton Place
Room 1306
Boston, MA 02108

Prerequisite: None
Course Level: Basic
Instructional Method: Group-Live

This course provides 13.5 professional development points (PDP) and 13.5 continuing professional education (CPE) points.
